

Tow Truck and Storage Place

In order to comply with the recent TDLR (Texas Department of Licensing and Regulation) compliance rules for Tow Truck and Vehicle Storage Facilities, Compliance Safety Systems (CSS) has developed two programs that will assist in keeping your company compliant as well as address your specific needs. This change in regulations came from the Texas Tow Act House Bill 2094, 80th Texas Legislature.

In reference to the recent change in the regulations, your firm must be a member of a TDLR Approved Consortium or have a Drug Testing policy approved by TDLR.. The regulation states that you must perform a Pre Employment test on each employee, that you must test each employee once a year and randomly test 25% of your work force on an annual basis and provide documentation of such. CSS can provide your company services in all of these areas. CSS is the leading provider of Third Party Administration of Drug and Alcohol Testing Services for regulated industry.

CSS recommends that if you have less than 10 drivers you should go into our Consortium Program. This program will allow your tow truck operators to be placed in our TDLR approved program and be randomly spun each quarter with other CSS customers that have also joined our program. If your company has more than 10 drivers we will provide you a policy and set you up on as a customer in our system that will provide you web based services and randomly spin your drivers independently. Either format you choose will satisfy these regulations.

CSS has established a Network of clinics through out the state of Texas to help our customers find a convenient place to provide testing. CSS will be able to offer a more economical rate in our Preferred Clinic Network, due to these clinics providing a lower cost to CSS for their services.

See the list provided for our available Preferred Clinic Network locations in your local area. See pricing options below:

Drug Screen Collections, Lab Analysis and MRO Review at Preferred Network Clinics are \$55.00

Drug Screen Collections, Lab Analysis and MRO Review at Out of Network Clinics are \$69.00.

In order to join either program we will need the following information:

Company Name _____

Owner _____

Business Address _____

Business Phone # _____

Alternate Phone # _____
