

A Third-Party Administration Partner that handles ALL PHASES of your hiring process effectively and efficiently.

Compliance Safety System, (CSS) the Technology Leader in Third Party Administration of Drug and Alcohol Testing Services, has expanded its services with the Background Screening process.

CSS combines a server based process with a professionally trained customer service staff, to allow customers to better manage, maintain, control and properly administer the required pre-employment documents. CSS is your one stop shop. Allowing customers to use the system for Background Screening along with Drug and Alcohol documents.

CSS Background Services will store the following applicant documents for your company to log in and retrieve at ease:

- TRUST – Tracking Residences Using Social Security Trace
- National Criminal Access Search (Criminal offender database)
- Federal Criminal Record Search
- County Criminal Record Search
- County Civil Record Search
- Statewide Criminal Record Search
- Employment Verification
- Education Verification
- MVR (Motor Vehicle Reports)
- I9 Document Storage
- I9 Verification/E Verify check
- CDLIS (Commercial Driver's License Information System)
- Social Security Trace/ID Report
- Sexual Offender Registry Check
- OFAC (Office of Foreign Assets Control) – Suspected Terrorist Watch List

Compliance Safety Systems Background Services also include the following:

- TRUST - Tracking Residences Using Social Security Trace. To include Social Security Trace and Unlimited County Criminal Records Checks in counties of residence for previous 7 years.
- Provides in-person/real-time criminal record information.
- A System that allows customers to choose the reports needed.
- An assigned Customer Service Representative (CSR) will monitor all open requests and take the appropriate action required to produce the documents as quickly as possible. The CSR will enter notes for the customer to review and check status. If needed, to make aware of the delay and when the request will be resolved and completed.
- Our Customer Service Team works with our vendors to have all documents imaged into the system for availability to review upon demand.
- The CSS Background Services system has 2 levels of hierarchy access to assure the customer will have secure information, share reporting information and distribute the workload required internally.
